The train was designed by Donato Coco and Jean-Pierre Ploué, previously known as the Renault Twingo. This was Citroen's first car company, which had multiplex companies from the beginning of production (Citron Xsara received it only during breaks). It is also the first PSA train to have benefited from the installation of a small HDI diesel engine. Rich in equipment classes and a large selection of complete sets allow the C3 to achieve significant commercial success. The C3 can be found with 1.1, 1.4 and 1.6 litre petrol engines, as well as 1.4 and 1.6 litre HDi Common Rail diesel engines. All models come standard with a five-speed manual transmission or an automatic half-option with suis pidulovymy except the Stop & Start model, which is equipped with sntroenovskoyu Sensodrive - a five-speed autopara gear box with manual and automatic mods. The SX version is the only fully automated classic gear box. The train is equipped with an electric power station. Also given attention is the installation of the roof telus panorama as an option. According to the basic chassis of the C3 PSA Group is used for peugeot 1007 and Peugeot 207. Many components are obtained from the C3 Peugeot 206. In July 2009, Citroen showed the second generation C3. Body shape-changer with a panoramic front mirror has been stretched, giving the field of view 108 108 The same panoramic glass is mounted on the older C4 Picasso and Opel Astra Sport hatchback, as well as on an all-new VT model. Like previous generations, the new C3 uses the shape of the cerun roof and other granules of its predecessors, as well as the features of the shape-set that overlap with other brand models, and at the same time it has become wider and longer than the previous one. Suluh lamps, hud, leaderboards and other components are common with DS3 models. The new C3 uses a mixture of analog dail under the surface and digital exposure to the use of fuel and computer exposure on board. There is no cooling temperature indicator (unlike the DS3), but there are blue and red warning lights to indicate the cool or hot state of the motor. From the engineering corner this model received its predecessor engine, but Citroen has announced a new line of small petrol engine, which has been created by PSA with the cooperation of BMW. The Prince's motor line has a head of sixteen cylinder block injap with two distributions and the VVT, a brand-named system for direct injection of petrol and BMW shaving. The motor is saving, has low CO2 release and good performance. Comes in versions 1.4i 95 hp and 1.6i 120 hp, can also be found on other PSA and BMW models. All engines, including diesels, have a CO2 release below 120 g/km, and Airdream + versions up to 99 g/km using the new 1.6 HDI 91 hp diesel engine. The cost is also enhanced by cruise control and speed limiting, available as standard equipment in VTR+, Airdream+, and Exclusive gear boxes. All models are equipped with delivery efficiency standards as standard equipment - the device graphically shows which gears to turn on and when necessary change gears up or down to optimize fuel usage. The new C3 was presented at the Frankfurt Motor Show in September 2009. It was launched in November 2009 as a model for the 2010 model year. In Europe, an advertising company under the motto The Visiospace has been held - a panoramic windshield with a wider look.
